Personal Summary

I'm a 300-level Computer Science student at Osun State University, passionate about backend development and currently building projects using Django. I'm also exploring FastAPI to broaden my backend development experience. I love to learn by doing, enjoy collaborating with teams, and am eager to work in fast-paced, remote-friendly environments like startups. I'm currently learning Golang to further grow my skills in scalable backend systems.

Education

Osun State University, Osogbo
B.Sc. in Computer Science – 300 Level
⬚ Nigeria | Expected Graduation: 2026

Technical Skills
